Bringing Science to the Art of Cleaning™

PCS CLEANING TO PROTECT PUBLIC HEALTH

Spreading germs from the ongoing cleaning and disinfecting of frequently touched surfaces is one way we can become infected with a wide variety of pathogens.

PCS is committed to providing simple easy to use evidence based cleaning and disinfecting processes that minimize the risk of spreading germs from the process.

PCS Process

Cleaning

MicroClean.

Take one sheet from dispensing bucket and place in empty bucket and fill with 4 litres of water.

Discard solution and cloth when solution is visibly soiled.

Disinfecting

PCS 7000 Disinfectant/Disinfectant Cleaner.

Take one cloth from dispensing bucket and place in empty PCS container and add one litre of water or fill to bottom of PCS logo .

Discard solution when visibly soiled or when chlorine concentration is reduced.

Making up the dispensing cloth buckets:

- Add 1.9 litres of concentrate to empty PCS bucket or fill near top of PCS logo.
- Place roll of PCS wipes in bucket slowly.
- Thread first cloth through lid and place lid on bucket securely.
- Place work place label on side of bucket .
- Place one or two caution concentrate labels on lid of bucket.
