

MICROFIBRE GENERAL PURPOSE & LAUNDRY CLEANER

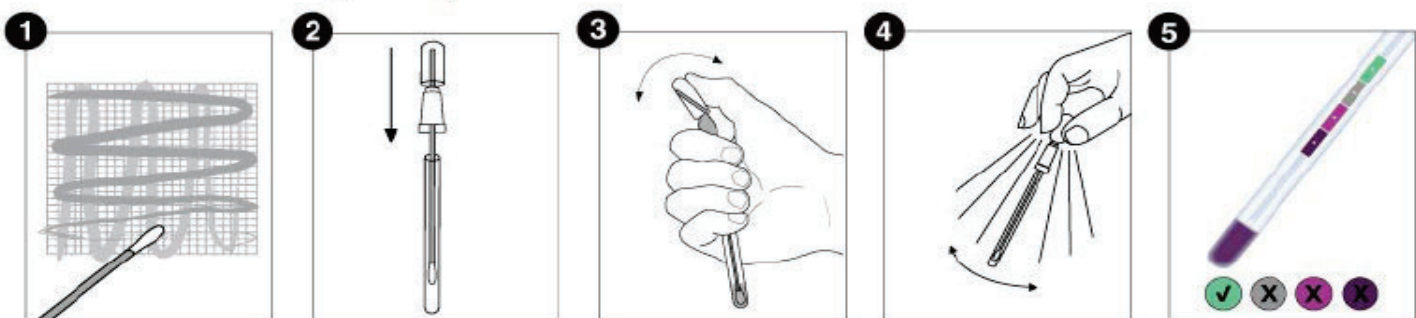

Cleaning is dirt simple: just get rid of the dirt. The trouble is, that's not always how people clean. We use cloths and mops to pick up the dirt, and in the process, those cloths and mops also transfer some of the dirt they pick up over a wider area, spreading harmful pathogens and harmful invisible chemical residues like Fentanyl potentially exposing building occupants to harmful contaminants.

Use ECoGent Apply and Dry cleaning to effectively remove dirt and prevent spreading harmful contaminants.

Use PCS patented Apply and Dry process with ECoGent to clean and remove harmful pathogens and trace residues of fentanyl without spreading them over a wider area.

Use ECoGent Apply and Dry cleaning process to replace cleaning with One step disinfecting detergents.
 Wipe surfaces with hygienic microfiber cloth with diluted solution.
 Wipe Surfaces Dry with a dry hygienic microfiber cloth.

Use on site Protein swabs to validate cleaning efficacy See visual results in 1 to 10 minutes. No equipment.

One step cleaning and disinfecting process transfers some harmful pathogens and Fentanyl residues over wider area on frequently touched surfaces in public spaces.

* When cleaning site of drug overdose follow institutions policy and procedures .

MICROFIBRE GENERAL PURPOSE & LAUNDRY CLEANER

ECOgent Microfibre General Purpose and Laundry cleaner with Micro Dispersant technology brings new science to the art of cleaning. Implementing ECOgent cleaning program provides outstanding surface cleaning as well as the care and laundering of microfibre cleaning cloths and mops.

Use ECOgent as the laundry detergent to protect your investment in microfibre cloths. Ideally suited for use with household and small commercial applications. **Use ECOgent Apply and Dry cleaning to replace cleaning with disinfecting detergents. Antimicrobial stewardship programs support their restricted use.**

Directions for use General Purpose Cleaning

Dilute 8 mls per liter of water. Use to clean floors, walls, counters, bathroom fixtures and anything that needs routine cleaning. No rinsing required.

Laundering of microfibre and other cleaning cloths and mops

Manual cleaning

Rinse cloths or mops with warm water and wring out. Make up fresh solution of ECOgent. Soak cloths or mops for a few minutes and wring out a few times. Rinse cloths and mops in fresh warm water. Wring out cloths and mops and allow to air dry. Caution do not leave damp mops and cloths bunched up or sitting in a bucket of solutions for extended periods of time.

Household and small commercial washers

Set washing program for heavy soil loads, with hot water cycles and extra rinse. Add 60 mls to front loading machines and 90 mls for top loading machines.

Product Codes:

5983-4 ECOgent Microfibre 4x2L with 6 microfibre cloths

5984-2 ECOgent Microfibre 2x3.78L closed loop

5984-4 ECOgent Microfibre 4x3.78L open stock

The ECOgent logo consists of the word 'ECOgent' in a bold, blue, sans-serif font. The letters have a white outline and a slight 3D effect, giving them a clean and modern appearance.
